

# RELY – Scenario Demand Management

---

# Scenario Demand Management

This module will be used for provisioning, changes and de-provisioning of Scenario Demand in the portal.

## Roles

Accountant  
Scenario Demand Editor  
Scenario Demand Reviewer

## Menu

Library -> Scenario Demand

## Creation

Typically Accountant can create Scenario Demand. All mandatory fields will be marked with red asterisk (\*).

Scenario Demand Can be created from two places

- 1) Within the Request
- 2) Within the Product

## 1)Within the Request

### Create a Request with product

Vodafone Germany Accountant

REQUESTS PRODUCTS LIBRARY MASTER DATA REPORTS HELP

#### Edit Request ( RequestScenarioDemand )

Name or ID\* RequestScenarioDemand Authorization# System PPM

Situation:	15c	-	Applicable scenario when the Customer is offered with a pool of services on a framework level.
Scenario:	ES-18.1	-	Pricing is based on pooling structure, where there is a fixed price per month on the entire contract. There is also a fair usage policy, so anything in excess of the tolerance level is incrementally charged based on fixed contract rates - i.e. no tier pricing. Fixed price per month results in minimum spend commitment, regardless of number of connections.
